

PDG Bill Bean, MD

November 20, 2019

Dear Esteemed Governor,

The promotion of adequate intake of vitamin K2 in our diets to improve public health is of utmost importance. I was able to attend the convention in Atlanta to educate our governors about the health benefits of vitamin K2 as well as our cutting edge participation in getting the message out to all Rotarians. I envision an impact that will significantly decrease disease everywhere.

I have made two articles available, a short and longer version, for use in your newsletter to help increase awareness of the importance of vitamin K2 in disease prevention. Readers of your newsletter will be informed of the critical health benefits provided by Vitamin K2 and directed to the resources and contact information on my website.

I am available for any questions or additional inserts to your newsletter.

Sincerely,

*Bill Bean*
